## Why do I need to have it inspected?

The State of California mandates that all backflow devices be tested annually. Backflow devices are mechanical systems that can malfunction, and yearly testing minimizes the risk of mechanical failure.

## What is a Backflow Device?

A backflow device is installed in your property's water line to allow water to flow in only one direction.

## Why is it necessary to have one?

You depend on safe water in your home or business. A backflow device helps prevent contaminants from flowing back into the county's domestic water supply.

## I am a Backflow tester. How much are backflow tags, and where do I get them?

Backflow tags are \$5.00 each and are available at our office. 7090 McComber Street, Sacramento, CA 95828. 916-383-0808

## I am a Backflow tester. How do I get added to your list?

Email us/bring in/or fax a copy of your Annual Calibration Certificate along with your AWWA Certification
